The OCME OCM-030 COMPATTA is a rotor machine for the dry spraying of gunite, concrete and refractory mixes.

The possibility to mount rotors and hoses of different size together with a complete range of accessories make the OCME-030 COMPATTA a very flexible working tool adaptable to a wide range of job-site requirements.

The well know and tried rotor working method together with the unique OCME's hydraulic clamping system of the rotor between the lubricated gaskets guarantee a perfect operation in any working conditions.

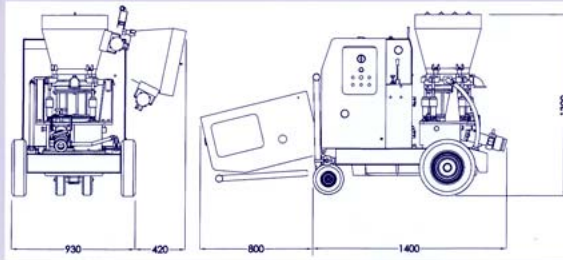

The machine can be supplied in the DOSA version with an integrated synchronized dosing unit for the liquid quick setting chemical admixtures. Two digital displays will indicate instantly the concrete and admixture outputs. Other accessories available are: high pressure water pump, remote control unit, central automatic lubrication unit, charging silo.
