DOSING SYSTEMS FOR LIQUID  
CHEMICAL ADMIXTURES

ODP - 018

ODP - 025

OCMER ODP-018 LIQUIDO and ODP-025 LIQUIDO enables the accurate dosage of concrete liquid chemical admixtures. Typical applications can be found in the execution of sprayed concrete linings, where is normally required the use of liquid quick setting accelerators.

A peristaltic dosing pump driven from a motor-inverter allows to set infinitely the required output that is instantly visualized on a digital display.

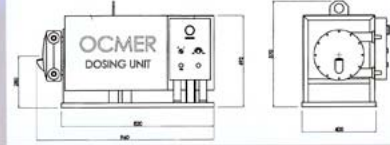

The extreme function and use's simplicity guarantee a correct and continuous dosage in any working conditions.
